2027 SOLUTIONS GUIDE

WELCOME TO THE

Peterson

SOLUTIONS GUIDE

You may notice something different right away.

We no longer call this a Product Guide.

IT'S OUR SOLUTIONS GUIDE.

Why? Because we don't believe farmers are looking for products.
They're looking for solutions.

Some solutions help maximize yield. Others help manage risk. Some are built for tar spot pressure, white mold concerns, IDC challenges, drought-prone acres or tough ground. Others create opportunities through specialty crops, premium contracts and value-added markets.

Every hybrid, variety and program in this guide has a purpose. We believe it can solve a challenge, create an opportunity or improve profitability on your farm.

You may also notice another change.

Peterson Farms Seed is now simply Peterson.

While seed remains at the core of who we are, our commitment to growers extends far beyond the bag. Through expanded agronomy support, one of the region's largest independent research programs, specialty crop opportunities and strategic partnerships, we're helping growers make more informed decisions across their entire farm.

The name may be different. The mission is not.

Since 1995, our goal has been simple:

Help growers make smarter decisions and build stronger operations.

Welcome to the
2027 PETERSON SOLUTIONS GUIDE.

CORN

74-103 DAY CORN HYBRIDS

Solutions for yield, standability and performance.

From risk management to top-end yield opportunities, our corn hybrids are tested, trusted and ready to perform in your fields.

LOOKING FOR THE RIGHT FIT FASTER?

Use the Quick Solutions Guide to identify hybrids that match your priorities, whether that's top-end yield, drought tolerance, emergence, early vigor or dual-purpose performance.

Trecepta® RIB Complete®
DroughtGard® Hybrids with
VT Double PRO® RIB Complete®

22C74

74
DAY

- Fixed ear type ideal for higher planting populations
- Best suited for northern zones with strong yield potential on productive soils
- This hybrid will thrive on your better soils

Tight spacing and high expectations are where fixed-ear 22C74 thrives.

25B76

76
DAY

- A long-awaited Roundup Ready® Corn 2 hybrid to the sub 80-day market with top-end yield that competes with current 80-82 day hybrids
- Solid agronomics top to bottom: stalks, roots, drydown and test weight
- Strong Goss's Wilt, tar spot, gray leaf and anthracnose scores
- Very good drought tolerance that can travel across the Highway 2 corridor

Strong agronomics and drought toughness make 25B76 a standout across the Highway 2 corridor.

21N78

78
DAY

- Excellent root strength and highly responsive to high-yield environments, including irrigated acres
- Dent-by-dent kernel type supports fast drydown and grain quality
- Responds well to high populations: Maximize return with intensive management
- Strong late-season health supports early maturity harvest timing

Irrigation All-Star: from pivots to prime acres, 21N78 delivers.

72J78

NEW

78
DAY

- Raises the bar for yield in the 78-day maturity range
- Semi-determinate ear with strong test weight and great drydown
- Good drought tolerance with very good root strength and greensnap
- Solid stalks support standability across environments
- Consistent performer with wide-footprint and high yield potential

78-day acres just found their new ceiling.

77P79

79
DAY

- Broadly adaptable genetics for northern soils
- Dependable hybrid with flexible fit across tough, variable and ideal acres
- The "Goldilocks of Stature" - not too tall, not too short. Just right!

Need a hybrid that works across the whole farm? 77P79 is built to handle it all.

13Z80

DUAL-PURPOSE

80
DAY

- Outstanding yield potential for our earliest conventional option
- Exceptional ear girth up to 20 around
- Open husk supports rapid drydown and early harvest
- Strong agronomics and broad soil adaptability

A conventional standout, 13Z80 offers fast drydown and big yield in one package.

25J80

DUAL-PURPOSE

80
DAY

- Solid agronomics allows this hybrid to move east to west
- Another game-changing early hybrid with girth that will take us to the next yield level
- Nice staygreen with very good drydown

If you've been in the market for an 80-day RR2® hybrid, 25J80 is the ticket.

70D80

DUAL-PURPOSE

80
DAY

- A fast finish and yield like a much later-season hybrid
- Strong late-season appearance and standability for flexible harvest
- Girthy ears with open husk contribute to drydown speed
- Performs reliably on both variable and high-performing soils

The Cornerstone: 70D80 is the yield standard.

71V81

81
DAY

- Good ear girth and Goss's Wilt rating
- Ideal fit on tough and variable soils
- Great stalk and roots for an extended harvest window
- Very early to flower and reach black layer
- Versatile placement makes this a go-anywhere hybrid

71V81 is the perfect hybrid for managing risk across acres.

72K82

NEW

82
DAY

- Impressive yield performance across a wide range of environments
- Broadly adapted with strong east-to-west movement
- Semi-flex ear with reliable drydown and test weight
- Good drought tolerance with solid stalk and root strength
- Consistent late-season performance paired with a balanced agronomic package

The 82-day hybrid we have been waiting for!

19H83

DUAL-PURPOSE

83
DAY

- Adapted east to west across our region
- Very good Goss's Wilt tolerance, greensnap, roots and stalks
- Solid early vigor and drought tolerance
- Bulletproof consistency for placement on tough acres

A great conventional tool in the "tough-acre" toolbox.

22T83

DUAL-PURPOSE

83
DAY

- This Roundup Ready® Corn 2 hybrid can handle all soil types extremely well
- The consistent ear size maintains yield up and down the rows
- Greensnap stands no chance with this hybrid's stalk strength

Thrives on every soil and shrugs off greensnap while it's at it.

74F83

83
DAY

VTDoublePRO®
RIB COMPLETE™

- Stable hybrid across all environments with good flex
- Very good early vigor and drought tolerance
- Built to handle the variability that comes with tougher ground
- Broad adaptation across our east-to-west footprint

74F83 is drought tolerant and built for acres that don't always cooperate.

24Z84

NEW

84
DAY

Roundup Ready²
CORN

- Very good early vigor and drought tolerance
- Broadly adapted across our east-to-west geography
- Best suited for tough and variable, low-producing acres

Don't let rough acres hold you back. 24Z84 powers through drought with early vigor and reliable standability.

73S84

DUAL-PURPOSE

84
DAY

VTDoublePRO®
RIB COMPLETE™

- Excellent agronomics and a good choice for variable soils
- Displays strong emergence and seedling vigor
- Medium-statured plant with excellent stalk and root strength
- Very consistent ear development across planting populations
- Impressive disease tolerance including Northern Leaf Blight and Goss's Wilt

Our No. 1 hybrid. The most consistent performer we've ever had.

75W84

NEW

84
DAY

VTDoublePRO®
RIB COMPLETE™

- This new hybrid shows strong yield advantage over comparable hybrids with improved drydown
- Semi-flex ear with consistent performance across environments
- Very good greensnap tolerance and drought response
- Medium stature with solid stalks, roots and late-season intactness
- Broad adaptation east to west

The 84-day slot just got a long stronger.

25K85

85
DAY

Roundup Ready²
CORN

- Exceptional stalk and root strength for maturity
- Excellent staygreen and intactness
- Outstanding top-end yield potential and fast drydown

Tough ground? Here's your hybrid. 25K85 thrives on any soil.

67C85

DUAL-PURPOSE

85
DAY

POWERCORE
Enlist
REFUGE ADVANCED™

- Our earliest PowerCore® Enlist® hybrid
- Excellent late season intactness with top-end yields
- Position Hwy 281 and east on transitional and best soils
- Average drought tolerance
- Solid roots, stalks and greensnap

If you haven't tried a PowerCore® Enlist® hybrid, make this your first.

75G85

85
DAY

VTDoublePRO®
RIB COMPLETE

- Impressive performance across high- and low-yield environments
- Very adaptable hybrid with proven ability to move both south and west
- Flowers early and flares husk to enhance drydown
- Exhibits very good staygreen and intactness

Looking for a dual-purpose option that thrives across all acres? Give 75G85 a shot.

78R85

85
DAY

VTDoublePRO®
RIB COMPLETE

- Top-end yielding hybrid with very girthy ears and fast drydown
- Medium-statured hybrid that moves well from central North Dakota into Minnesota
- Very good emergence with strong early vigor
- Uniform ear development with deep kernels
- Caution under drought conditions

78R85: Setting the standard with uncharted yield potential.

16S86

86
DAY

- Good for early planting and reduced tillage environments
- We love this medium-statured hybrid with very good stalks and roots
- This “race horse” hybrid is impossible to replace in our lineup

16S86 wins on yield, stands like a rock and anchors your conventional acres.

71P86

86
DAY

VTDoublePRO®
RIB COMPLETE

- Very good plant vigor and good drought tolerance set this hybrid up for success
- Excellent for maximizing your marginal acres under low-to-moderate populations
- Nice agronomics with greensnap, Goss's Wilt and intactness
- Girthy, semi-flex ear that holds up with western movement

Maximize your marginal ground with 71P86.

77B86

NEW

86
DAY

VTDoublePRO®
RIB COMPLETE

- 90-day yield packed into an 86-day hybrid
- Semi-flex ear with consistent results across diverse environments
- Good drought tolerance with solid stalk and root strength
- Balanced plant structure with reliable staygreen and intactness
- Broad east-to-west adaptability

The early-season vigor built for our northern climate and cold soils.

79K88

88
DAY

VTDoublePRO®
RIB COMPLETE

- The kind of solid agronomics that help you sleep at night
- Good staygreen, Goss's Wilt tolerance, drought and greensnap: this hybrid has it all
- Likes populations at 32-36k, but shows its ability to flex at 28k
- Medium-stature plant that goes across our footprint

Agronomics, population flex and adaptability - that's 79K88.

90V88

NEW

88
DAY

VT4PRO™
RIB COMPLETE

- New early VT4Pro™ hybrid with strong yields for its maturity
- Semi-flex ear with very good greensnap tolerance and test weight
- Good drought tolerance with solid stalk and root strength
- Medium-stature plant with strong late-season intactness and impressive staygreen
- Broad adaptability across your footprint

Got rootworm? Our earliest corn rootworm protection.

15H89

89
DAY

- Good all-around agronomics with roots, stalks, greensnap, test weight and vigor
- Very good drought tolerance with flex for western movement and Minnesota sands
- Tall hybrid that excels in low to moderate yield environments
- Average staygreen and intactness

All-around toughness built for low-to-moderate populations.

64C89

DUAL-PURPOSE

89
DAY

POWERCORE
Enlist
REFUGE ADVANCED

- Strong agronomics and placement flexibility
- Exciting PowerCore® Enlist® hybrid with top-end yield
- Very good Goss's Wilt and greensnap tolerance
- Semi-flex ear that adjusts well to all populations
- Good late-season intactness with open husk

If you haven't tried PowerCore® Enlist® corn yet, you're missing out.

74R89

DUAL-PURPOSE

89
DAY

VTDoublePRO™
RIB COMPLETE

- Handles tough and variable environments across a wide footprint
- Performs well at low-to-moderate populations
- Solid agronomics including strong stalks and roots, greensnap and early vigor
- Very good drydown

When it comes to stability, 74R89 is a sure thing.

77H90

90
DAY

VTDoublePRO™
RIB COMPLETE

- Very good early vigor that is well suited to early planting
- Medium-statured hybrid
- Average Goss's Wilt rating, so keep off those hot spots
- Solid agronomic package, including stalk and root ratings
- All-around hybrid: Place anywhere and forget about it

77H90 is built for the grower who doesn't want to babysit.

27F91

91
DAY

Roundup Ready²
CORN

- Travels well east to west while maximizing yield potential across soil types
- Well-rounded disease package, including Goss's Wilt
- Displays flex, along with open husks for quick drydown
- Dependable all-around hybrid that won't let you down

One of the most dependable hybrids in the book. Count on 27F91 for every acre.

72A91

91
DAY

VTDoublePRO®
RIB COMPLETE

- Showcases outstanding yield potential with a well-rounded disease package
- Good ear flex and drydown with open husks
- Very good drought, greensnap and Goss's Wilt tolerance

Dealing with heat, wind and disease? 71A91 handles it all.

74V91

91
DAY

VTDoublePRO®
RIB COMPLETE

- Performs well in zone and south
- Strong agronomics and field appearance
- Good drought tolerance
- Cornerstone in our lineup with variable and ideal soil placement

With consistent performance and strong agronomics, 74V91 is as dependable as they come.

91Z91

NEW

91
DAY

VT4PRO™
RIB COMPLETE

- High-yielding VT4Pro™ hybrid with broad adaptability across environments
- Excellent greensnap tolerance with strong root strength
- Medium-short plant with balanced ear placement
- Strong agronomic and disease package supports consistent performance
- Good early vigor with dependable drydown and staygreen

Big yield. Big footprint. No excuses.

16S92 26S92 76S92

DUAL-PURPOSE

92
DAY

Roundup Ready² CORN
VTDoublePRO®
RIB COMPLETE

- Very good early season vigor with good stress tolerance
- Widely adapted across varying environments
- Will perform best in its maturity zone, but has good southern movement
- Fantastic yielding product with fast drydown

Dealing with salty soils? Look no further!

71D92

NEW

92
DAY

Trecepta®
RIB COMPLETE

- Top-end yield leader across multiple maturity sets in testing
- Semi-determinate hybrid with very girthy ears
- Very good stalk and root strength supports standability
- Broad adaptation across east-to-west environments
- Balanced agronomic package with consistent performance

Truly the next level in yield.

62P93

NEW

93
DAY

POWERCORE
Enlist
REFUGE ADVANCED

- Thrives on well-drained soils
- Strong performance with broad north-to-south and east-to-west adaptability
- High ear flex hybrid with best performance at 28-34k populations
- Good stress tolerance with reliable yield across variable conditions
- Solid late-season stalk strength supports standability

New PowerCore® Enlist® hybrid with consistency and top-end yield.

16V94

DUAL-PURPOSE

94
DAY

- Excellent greensnap, test weight, vigor, intactness and drydown
- Solid stalks, roots and drought tolerance to help you sleep at night
- The highest yielding conventional ever brought into the lineup
- Average Goss's Wilt and tar spot tolerance

No trait, no worries. 16V94 sets a new bar as our highest-yielding conventional ever.

72Q94

DUAL-PURPOSE

94
DAY

VTDoublePRO
RIB COMPLETE

- Taller plant with excellent agronomics and yield
- Consistent performance over your entire field
- Impressive stalk and roots, with late-season intactness and staygreen
- Dual-purpose hybrid with excellent silage potential
- Flared husk with fast drydown for maturity

Excellent for silage, strong for grain—72Q94 brings the height, health and harvest ease you need

74M94

DUAL-PURPOSE

94
DAY

VTDoublePRO
RIB COMPLETE

- Top-end performance four years running
- 97-day yield with 94-day drydown
- Very good greensnap, early vigor and test weight
- Average Goss's Wilt tolerance limits westward movement

Plant it for the yield. Keep it for the reliability.
74M94 combines strong early growth with a finish that beats the calendar.

94V94

NEW

94
DAY

VT4PRO
RIB COMPLETE

- Built specifically for strong performance across the Peterson footprint
- Strong western adaptation with dependable yield potential
- Excellent emergence and early-season vigor
- Medium plant type with solid stalk and root strength
- Very good greensnap tolerance with reliable drydown

Short on moisture? Try 94V94.

2FF95

NEW

SILAGE

94
DAY

**Roundup
Ready²**
CORN

- New full-floury hybrid replaced 2LF95
- Taller plant type with improved tonnage potential
- Strong agronomic package supports consistent performance
- Excellent yield potential for silage-focused operations
- Drop your population by 10% to maximize tonnage

Full-floury power built to pile on tonnage and yield.

71R95

95
DAY

DroughtGard
HYBRIDS
VTDoublePRO
RIB COMPLETE

- Good option for your tough-to-variable acres
- Medium-tall hybrid with higher ear placement
- Very good agronomics with solid late-season intactness
- Flex ear that works well in variable rate populations under 32k

Built for the acres that make you think twice.
71R95 stays upright, fills the ear and doesn't flinch at lower populations.

72D95

NEW

95
DAY

VTDoublePRO®
RIB COMPLETE

- New yield benchmark backed by multiple years of testing
- Semi-flex ear with strong yield consistency across environments
- Very good early vigor supports early planting success
- Excellent staygreen and late-season intactness
- Medium-tall plant type with strong overall agronomics

Top of the yield charts two years running.

76Y96

96
DAY

VTDoublePRO®
RIB COMPLETE

- Excellent top-end yield potential across all acres
- Very strong emergence
- Very good drought tolerance for tougher acres
- Trustworthy early vigor for early planting and reduced tillage acres

Still winning farms: The consistency hybrid.

20Z96

96
DAY

**Roundup
Ready²**
CORN

- Stands out against most hybrids on high pH, high salt soils
- Very good drought hybrid
- Excellent late-season intactness

Handles most soil types extremely well.

82S96

NEW

96
DAY

SmartStax® PRO
RIB COMPLETE

- With strong yield performance, 82S96 is the first SmartStax®Pro hybrid in our lineup
- Girthy ear type supports high yield potential
- Very good early vigor with strong stalk strength
- Good drought tolerance and overall agronomic balance
- Medium-tall plant with strong late-season intactness and drydown

An easy addition with yield and consistency.

85W96

DUAL-PURPOSE

96
DAY

SmartStax®
RIB COMPLETE

- Best suited for Minnesota. Manage carefully for Goss's Wilt pressure in the Dakotas
- Strong greensnap tolerance, test weight and late-season intactness support overall performance
- Sets a benchmark for yield potential for mid 90-day SmartStax®
- Taller plant with higher ear placement

85W96 is the mid-90-day solution for our increasing rootworm pressure.

74A97

97
DAY

Trecepta®
RIB COMPLETE

- Excellent top-end yield potential
- Semi-flex ear adapts well to moderate planting populations
- Strong stalks, roots and greensnap tolerance support standability
- Solid Goss's Wilt tolerance enhances in-season health
- Features reliable staygreen and late-season intactness for flexible harvest timing

74A97 is a balanced powerhouse with agronomics.

78P98

DUAL-PURPOSE

98
DAY

Trecepta
RIB COMPLETE

- Exceptional performance
- Large girthy ear with deep kernels
- Robust hybrid with very good Goss's Wilt tolerance
- Late flowering, fast-drying hybrid for both grain and silage markets

Late to flower, quick to finish. 78P98 also brings robust agronomics.

85Q98

98
DAY

SmartStax
RIB COMPLETE

- Breakthrough yield levels for a 98-day SmartStax® hybrid with excellent northern adaptability
- Well-rounded agronomics supported by a solid defensive package
- Offers strong drought tolerance, vigor, test weight and root strength
- Average Goss's Wilt tolerance so make sure to monitor placement in high-pressure areas

Northern growers: Push your yield ceiling with this SmartStax® hybrid.

91V98

NEW

DUAL-PURPOSE

98
DAY

VT4PRO
RIB COMPLETE

- Versatile VT4Pro™ hybrid with strong yield across moderate-to-high yield environments
- Semi-flex ear supports consistent performance across acre types
- Good stalks, greensnap and drought
- Very good early vigor and drydown
- Balanced agronomic profile with dependable disease tolerance

Improved yield in a VT4Pro™ hybrid over our current lineup.

77D99

NEW

99
DAY

Trecepta
RIB COMPLETE

- No. 1 yield performer in our 97-100-day RM testing
- Semi-flex ear with excellent kernel fill and yield potential
- Very good stalk strength with solid root support
- Strong east-to-west adaptability
- Good greensnap tolerance with reliable drydown

Late-season muscle that pays on non-rootworm environments.

2LF01

SILAGE

101
DAY

Roundup Ready²
CORN

- Silage only! Drop your population by 10% to maximize tonnage
- Robust, leafy-floury hybrid
- Floury kernels for a boost in starch digestibility
- Offers big tons to maximize your silage acres

2LF01 should come with a warning: BIG TONNAGE ALERT!

75V01

DUAL-PURPOSE

101
DAY

VTDoublePRO
RIB COMPLETE

- Proven, all-around solid hybrid. Tested and trusted year after year
- Safe, medium-statured hybrid with strong northern movement
- Big, girthy ear delivers consistent performance even under drought stress
- Excellent general-use option: reliable, low-maintenance and widely adaptable

Consistent performer that's drought-tough. Meet 75V01.

92W01

NEW
DUAL-PURPOSE

101
DAY

VT4PRO™
RIB COMPLETE

- Long-awaited VT4Pro™ hybrid with strong top-end yield potential
- Broad adaptation across the tri-state region
- Excellent early vigor supports strong establishment
- Very good greensnap tolerance and late-season intactness
- Good stalk strength, root system and drought tolerance

92W01: Worth the wait and ready to prove it!

77Z03

DUAL-PURPOSE

103
DAY

Trecepta®
RIB COMPLETE

- High-performing, full-season hybrid with huge yield potential
- Slender ear type performs well at 32–37K populations
- Good Goss's Wilt tolerance
- Excels on medium- to high-yielding soils with ample fertility
- Maintains excellent late-season health for harvest flexibility

77Z03's staygreen rating gives you harvest options and flexibility.

88B03

103
DAY

SmartStax®
RIB COMPLETE

- Widely adapted hybrid with very good Goss's Wilt tolerance and low greensnap risk
- Excellent early vigor for minimum tillage and early planting
- Very good test weight with strong stalks and roots

88B03 is a great fit for minimum-till and challenging conditions.

| Glufosinate

| FOP Herbicides

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are labeled for preemergence and postemergence use on Enlist® crops.

- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two modes of action work together to deliver control of yield-robbing weeds and help prevent resistance
- Straight goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with glyphosate, glufosinate and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

Seed containing a patented trait can only be used to plant a single commercial crop. It is unlawful to save and replant Roundup Ready 2 Yield® soybeans, Roundup Ready 2 Xtend® soybeans, and XtendFlex® soybeans. Additional information and limitations on the use of these products are provided in the Technology Stewardship Agreement and the Bayer Technology Use Guide: tug.bayer.com. U.S. patents for Bayer technologies can be found at the following webpage: cs.bayerpatents.com.

Seeds containing the PowerCore® Enlist®, PowerCore® Enlist® Refuge Advanced®, Enlist® Corn - REFUGE and Enlist E3® traits are protected under one or more U.S. patents which can be found at www.traitstewardship.com. The purchase of this traited seed includes a limited license to produce a single crop in the United States. The use of seed from such a crop and/or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Corteva Agriscience Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements. To plant PowerCore Enlist, PowerCore Enlist Refuge Advanced, Enlist Corn - REFUGE and Enlist E3 seed, you must have a limited license from Corteva Agriscience (or other appropriate affiliates). In consideration of the foregoing, Corteva Agriscience grants to the Grower a limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed.

IRM - Properly managing trait technology is key to preserving it as a long term crop protection tool. Growers who fail to comply with IRM requirements risk losing access to this product. To help preserve the effectiveness of B.t. corn technologies, growers planting B.t. corn technologies are required to follow an IRM Plan. Consult the Corn Product Use Guide for appropriate refuge configuration options. Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology Use Agreement and Product Use Guide. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements. For complete details on IRM requirements for hybrids with Bt technology, including refuge examples and important information on the use of insecticides on refuge and Bt corn acres, please consult appropriate Product Use Guide. Go to www.traitstewardship.com to download the latest Corteva Agriscience Corn Product Use Guide.

Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3 soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Corteva Agriscience technologies can be found at www.traitstewardship.com. The transgenic soybean event in Enlist E3® soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C.

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist® crops. Enlist Duo and Enlist One herbicides are not registered for use or sale in all states and counties; are not registered in AK, CA, CT, HI, ID, MA, ME, MT, NH, NV, OR, RI, UT, VT, WA and WY. Contact your state pesticide regulatory agency if you have questions about the registration status of Enlist® herbicides in your area. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USE IN THE STATE AND COUNTY OF APPLICATION. USE OF PESTICIDE PRODUCTS, INCLUDING, WITHOUT LIMITATION, 2,4-D-CONTAINING PRODUCTS NOT AUTHORIZED FOR USE WITH ENLIST CROPS, MAY RESULT IN OFF-TARGET DAMAGE TO SENSITIVE CROPS/AREAS AND/OR SUSCEPTIBLE PLANTS. Additional product-specific stewardship requirements for Enlist crops, including the Enlist Product Use Guide, can be found at www.traitstewardship.com. The transgenic soybean event in Enlist E3® soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C.™ Trademarks of Corteva Agriscience and its affiliated companies.

POWERCORE® is a registered trademark of Bayer Group. POWERCORE® multi-event technology developed by Corteva Agriscience and Monsanto. LibertyLink® and the Water Droplet Design are registered trademarks of BASF.® Roundup and Roundup Ready are registered trademarks of Bayer Group. Always follow IRM, grain marketing and all other stewardship practices and pesticide label directions. B.t. products may not yet be registered in all states. Check with your seed representative for the registration status in your state.™ Trademarks of Corteva Agriscience and its affiliated companies

No dicamba may be used in-crop with seed with Roundup Ready® Xtend Technology, unless and until approved or specifically permitted in the state of application. Please follow www.roundupreadyxtend.com/pages/xtendmax-updates.aspx for status updates. Dicamba may harm plants that are not tolerant to dicamba.

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.

It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with products with XtendFlex® Technology.

Products with XtendFlex® Technology contains genes that confer tolerance to glyphosate, glufosinate and dicamba. Plants that are not tolerant to glyphosate, dicamba, and/or glufosinate may be damaged or killed if exposed to those herbicides. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs.

LibertyLink logo® and LibertyLink® are trademarks of BASF Corporation. ©2025 Bayer Group. All rights reserved.

DroughtGard®, RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready 2 Xtend®, Roundup Ready 2 Yield®, Roundup Ready®, SmartStax®, Trecepta®, VT Double PRO® and XtendFlex® are registered trademarks of Bayer Group. Herculex® is a registered trademark of Dow AgroSciences LLC. Insect control technology provided by Vip3A is utilized under license from Syngenta Crop Protection AG. Agrisure Viptera® is a registered trademark of a Syngenta group company. All Rights Reserved. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association. DroughtGard® Hybrids with RIB Complete® corn blend the refuge seed may not always contain DroughtGard® Hybrids trait.

IMPORTANT IRM INFORMATION: Certain products are sold as RIB Complete® corn blend products, and do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is a significant pest. Products sold without refuge in the bag (non-RIB Complete) require the planting of a structured refuge. See the IRM/Grower Guide for additional information. Always read and follow IRM requirements. B.t. products may not yet be registered in all states. Check with your representative for the registration status in your state.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® 2 Technology contains genes that confer tolerance to glyphosate. Plants that are not tolerant to glyphosate may be damaged or killed if exposed to those herbicides.

WHEAT

MUFFINS

57
DAYS TO HEADING

- Top-yielding performer in multiyear trials.
- Leads the pack in potential
- Strong test weight and protein while delivering standout yields
- Earlier heading than ROLLS
- Great standability

The earlier-heading wheat you've been looking for.

ROLLS

60
DAYS TO HEADING

- Proven high yield performance in multi-year data
- Strong fit for northern and western environments with broad adaptability
- Above-average protein and strong test weight
- Strong against bacterial leaf streak and stem rust

The yield you want with the protein the market demands.

EXCELLENT

GOOD

AVERAGE

25XF007

0.07
MATURITY

- Complete disease package for northern conditions, including SCN, IDC and Rps1C
- Excellent plant height for its relative maturity
- Strong early-maturity option that delivers consistent yields

If you need a 0.0 bean with strong disease protection, 25XF007 fits the bill.

26XF008

0.08
MATURITY

- Well-rounded variety with strong plant height for variable acres
- Stacked Phytophthora genes offer solid disease protection for northern fields
- Impressive yield potential for 0.08 maturity
- Lacks SCN resistance so place accordingly to manage cyst pressure

26XF008 is as tough against Phytophthora as spell check is on that word.

24XF01

0.1
MATURITY

- Excellent disease package provides broad adaptability
- Includes SCN resistance and above-average tolerance to SWM
- Taller plant height makes it a strong fit for lighter and variable soils
- Versatile row spacing compatibility allows flexible placement
- Solid IDC scores supports consistent performance

Made for northern variability, 24XF01 can be placed anywhere.

26XF02

0.2
MATURITY

NEW

- Yield performance and agronomics for both the west and the Valley!
- Nice pod height for easy harvest. No scraping the ground with this line
- Excellent IDC tolerance for tough acres, paired with very good BSR resistance and reliable standability

A clean, eye-catching plant that looks as good as it yields!

22XF03

0.3
MATURITY

- Performs well in heavy soils
- Solid IDC tolerance with good resistance to SWM
- Place carefully as it doesn't carry SCN protection
- A tall, branching bean that will fill all rows quickly

22XF03 is a great choice if you're in need of a tall, IDC-tolerant soybean.

26XF03

0.3
MATURITY

- Maintains strong plant height even under stress conditions
- Branching and full tops stack on extra yield
- A go-anywhere bean that also can handle your tough acres
- Improved standability on highly productive ground

Tough acres? No problem. High-yield ground? Even better. 26XF03 handles stress so you don't have to.

24XF04

0.4
MATURITY

- Taller plant type with excellent lodging resistance
- Stellar IDC tolerance
- Carries resistance to SCN and BSR for broad disease protection
- Attractive bean with next-level yield potential

24XF04 is one of our top-rated XtendFlex® beans for hot IDC ground.

25EN05

0.5
MATURITY

- Great IDC tolerance supports strong early-season performance
- Built-in defensive package made for tough IDC acres
- Our earliest Peking SCN-resistance variety

25EN05 offers a Peking and IDC punch that's tailor-made for northern fields.

25XF05

0.5
MATURITY

- Strong yield performance across all testing regions
- Maintains good plant height across all soil types
- Stacked Phytophthora genes and excellent field tolerance simplify placement decisions
- Excellent drought tolerance
- Well-rounded agronomics with homerun yields!

25XF05 is the "easy button" for placement that brings the yield.

26XF06

0.6
MATURITY

- A tall, thinner line that packs on the yield
- The right agronomics for any acre!
- Strong IDC tolerance allows hot IDC placement

With this bean's IDC tolerance, it will travel anywhere.

22XF06

0.6
MATURITY

- Delivers outstanding yields year after year
- Medium-tall, moderately-branching plant type suitable for all row widths
- Carries both SCN and Rps1c genes to anchor a strong disease package

22XF06 was built to anchor your XtendFlex® soybean lineup.

27EN07

NEW

0.7
MATURITY

- Strong emergence with adaptability for all soil types
- Excellent SDS and BSR tolerance for those disease-pressured areas!
- Average standability, but will stand tall at harvest

Top-of-the-line IDC with incredible yield potential to boot!

26XF08

0.8
MATURITY

- Thinner plant structure with excellent disease resistance package
- Broad adaptation across all environments
- Not too tall, not too short, just right

A great bean for high-yield environments!

25EN09

0.9
MATURITY

- Strong all-around disease package including SCN, stacked Phytophthora genes and excellent IDC tolerance
- Strong performance east to west
- Built for tough acres with reliable stand and stress tolerance
- Best placed in-zone and to the north for optimal results

25EN09 is a great pick for your challenging ground.

25XF10

1.0
MATURITY

- Top-end disease package
- Front runner in trials three years running!
- Exceptional yield consistency from north to south and east to west
- Robust disease package makes this bean easy to place

25XF10: A high-yielder that can be placed anywhere – a true easy button for your farm.

25XF13

1.3
MATURITY

- Strong performance across our footprint
- Top-end disease package includes stacked Phytophthora genes and emerging SWM tolerance
- A bean you can place anywhere
- Easily yields beyond its maturity

25XF13 boasts an early start and a strong finish with dependable yield to boot.

26EN14

1.4
MATURITY

- Great fit for west-central Minnesota
- Next-level yields in the mid-1.0 maturity group
- Maintains height on tight clays
- Average IDC scores, but will maintain its height on those tough acres

The triple threat: Peking, SDS AND yield in one package!

22XF14

1.4
MATURITY

- Taller variety with excellent lodging resistance
- Features Rps3a for tough Phytophthora soils plus above-average SWM ratings
- The industry standard for yield

Proven and reliable, 22XF14 holds it own.

27XF18

NEW

1.8
MATURITY

XTENDFLEX
SOYBEANS

- A bean that truly stands alone
- Excellent plant height for sandy and variable acres
- Well-rounded agronomic package for easy placement
- New yield level for late Group 1 XtendFlex® soybeans

An excellent choice for South Dakota XtendFlex® soybean acres with height, agronomics and yield.

IP SOYBEANS

HANA

0.09
MATURITY

CONVENTIONAL

- Yields competitive with comparable traited varieties
- Optimized for 15" or narrower row spacing
- Performs best at higher planting populations for top-end yield

Great ROI with yield comparable to non-IP beans.

AYA

0.7
MATURITY

CONVENTIONAL

- Yields competitive with comparable traited varieties
- Carries Rps3a for Phytophthora protection and very good IDC scores
- Lacks SCN resistance: Manage placement accordingly
- Good height with some branching ability
- Recommended for all row spacings

Need an IP bean that is adaptable? Heck AYA!

SOLUTIONS THAT GO BEYOND THE YIELD MONITOR.

Through Peterson and HC International, growers have access to premium opportunities backed by strong relationships, dependable contracts and growing demand.

CONTRACT DETAILS:

- **"Take-all" contract.** Every bushel is taken after minimal standards are met (truckload quantities).
- **No transportation costs for you.** Soybeans picked up from YOUR bins!
- **Testing proves minimal yield drag.** Multiple years of testing shows yields that are comparable to traited soybeans.
- **Superior premium!** Payments made on gross bushels (less any FM).

SUNFLOWERS

DAWN

E

**EARLY
GROUP 2
MATURITY**

ExpressSun[®]
trait

- Late-blooming hybrid with a fast finish and fall drydown for hassle-free harvest
- Best fit for northern ND and MN or late-season planting

Late to flower, quick to finish: Dawn E is a reliable early option for northern acres and delayed planting windows.

THRIVE CL

**MEDIUM
GROUP 4
MATURITY**

Clearfield[®]
Production System for Sunflower

- With top-tier stalk and root strength, this hybrid delivers consistently high test weight and clean, uniform stalks
- Above-average oil content and black seedcoat make this hybrid a strong fit for both bird food and oil crush markets

Built to stand and built to yield, Thrive CL combines strong agronomics with high oil potential across a wide footprint.

CRUSH CLP

**MEDIUM
GROUP 4
MATURITY**

Clearfield Plus[®]
Production System for Sunflower

- A complete agronomic package, strong stalks, downy mildew protection and enhanced weed control through Clearfield Plus sets you up for consistent yields

Premium oil content, balanced agronomics and dependable performance.

STAR

E

PROMISE+

REWARDS

**YOUR EARLY ORDER.
OUR THANKS.**
IT'S THAT SIMPLE.

Solutions don't start in the spring. They start with a plan.

Promise+ Rewards recognize farmers who plan ahead. Order by Dec. 15 and you'll earn points, unlock valuable benefits and position yourself for a smoother start to the season, while helping us better serve you.

EASY AS 1-2-3:

- 1** Sign an early order commitment by December 15, 2026.
- 2** Pick your payment method:
 - 0% financing with your local bank
 - Cash, including a cash discount based on payment date
 - John Deere Financing
- 3** Bask in our gratitude! Earn Promise+ points based on your commitment level. Select your reward with your dealer before January 15, 2027.

BONUS POINTS + CARRY-OVER

Loyalty Bonus: earn an extra Promise+ point when you commit at level 3 or higher AND plant 100% of your corn and soybean acres with us.

Tier Jumper: earn one point for each tier you jump (maximum of 5 points) over your historic-high level.

1 Year Point Carry-Over: carry point(s) forward one year to stack points and earn a larger reward. Requires equal or greater seed purchase year-over-year.
